The application has been amended as follows:

in claim 1, in line 6, "limiting" has been deleted; and
claims 21 and 22 have been canceled.

The following is an examiner's statement of reasons for allowance:

none of the prior art of record discloses or suggests a circuit for controlling arc energy from an electrosurgical generator and its method of use, comprising in part the combination of the following:

a circuit including a means for receiving an output current generated by the electrosurgical generator; and

a diode-resistor block electrically connected to said means for receiving the output current, said diode-resistor block configured to limit the amount of output current for at least one half cycle of the output current: said diode-resistor block including a pair of diodes biased opposite from each other and configured to split the
